

Protecting Defence

“Established Leaders who engineer, design and manufacture protection solutions - Securing Defence Lives and Assets”

Form CUT is supported by over 8 years of direct practical Defence packaging Design, Engineering and Manufacturing experience and employs a staff body that is significantly qualified and trained in Production, Engineering, Industrial Design, Procurement, Warehousing, Goods Inspection and Material Handling systems.

Form CUT was established from a base of partnering Engineering and Industrial Design skills with the intent and direction to create new business opportunities through creative problem solving.

Word of mouth and the movement of engineering staff resources across Australia drove Form CUT’s initial opportunity growth. Now a registered Defence Supplier ZOEMO and advisor on defence packaging standard DEF(AUS)1000C, Form CUT innovatively protects defence **Lives** with Occupant Protection and **Assets** with Protective Packaging, ready for operational deployment to the harshest conditions anywhere in Australia or around the World.

- **Occupant Protection** systems delivered by Form CUT enhance operational effectiveness and safety of Defence Personnel by utilising leading edge materials for explosion suppression, shock and impact absorption, and thermal and acoustic insulation. Product innovations include “RollPROTECT”
- **Protective Packaging** solutions created by Form CUT ensure operational readiness of Defence Equipment distributed across Sea, Land or Air. Additional to Custom Engineered Packing Frames and Case Inserts Form CUT partners with Defence Primes delivering PHS&T Services, Plans and complete Project Management.

Within Defence, Form CUT has built significant client respect over time with SAAB Systems, BAE Systems, THALES Australia, CEA Technologies, RAAF, DMO Land Engineering Agency and COBHAM Aviation.
